

THE OASIS STARR HOUSE

EXPLORE THE WORLD OF CONCRETE HOMES

USA is dedicated to creating beautifully and creatively designed, sustainable, energy efficient, affordable, durable, and safe homes that give many more Americans a shot at homeownership. Inspired by extensive architectural and engineering work, our goal is to provide buildings that are more than houses – our concrete insulated homes are designed to be homes that will last decades with minimal maintenance and make homeownership more affordable. These homes are modern yet timeless.

COMFORT AND COMMUNITY

The Oasis House is thoughtfully balanced inside and out. The small modern home embraces an open floorplan that seamlessly blend living, dining, and kitchen areas. To avoid looking too cluttered, simplicity reigns supreme in the Oasis House. Ideal for a small family or empty nester. A center hall plan promotes a sense of connectivity and an airy feel throughout the home.
